

## **Annexe B: Partial list of attacks on Blue and Green Helmets in Sudan and South Sudan, and seizure of materiel**

This annexe features data on incidents documented in the Small Arms Survey Diversion Dataset (see Box 3). It is structured chronologically, and features information on events, context, and materiel lost (or not) during attacks on AU and UN military and police personnel. Events include the date, the mission, and the location. Context includes a description of the incident and the casualties suffered by the mission's Blue and Green Helmets. The dataset includes five types of incidents: (i) attacks on convoys; (ii) attacks on fixed sites; (iii) attacks on patrols; (iv) carjackings; and (v) robberies. A third sub-section under 'Context' labelled 'Notes' provides additional background such as the number of peacekeepers attacked, the size of the attacking force, and other casualties suffered. 'Material lost' includes information on small arms and light weapons and their ammunition. A separate sub-section labelled 'Notes' mentions other materiel lost and equipment recovered. Incidents of diversion deemed to be 'notable' are flagged and a distinction is made among their levels of magnitude and between those that are verified or not. *Italics* are used when the information provided represents an approximate location or is based on an assumption.
