Gendering Small Arms Control for Peace: North Africa and Sahel Perspectives

Small Arms Survey event at Geneva Peace Week 2019

The role of women in controlling small arms and light weapons in North Africa and the Sahel-Sahara region is vital. By bringing together practitioners and speakers who have worked on small arms control for a regional organization, a national institution, and a local initiative to share their experiences, the Small Arms Survey—supported by Canada and the Netherlands—aims to reflect on successes and challenges, all while drawing lessons to inform future policies.

Co-organized by its Gender Lens for Arms Control Support and Sustainability (GLASS) and Security Assessment in North Africa and Sahel-Sahara (SANA) projects, the Small Arms Survey cordially invites you to join us on 5 November 2019 from 14.00h to 15.30h in Auditorium A1B, Maison de la Paix, for the Geneva Peace Week event ‘Gendering Small Arms Control for Peace: North Africa and Sahel Perspectives’.

Interested, and planning to attend the event? Please register here!
