Pathway to Policy: Integrating Security and Public Health Responses to Firearms Trafficking and Violence in the Caribbean

This project aims to improve the quality and availability of relevant data and analysis on matters related to firearms proliferation and misuse in the Caribbean. It builds on partnerships with leading regional institutions, from research organizations to security and public health stakeholders via knowledge sharing and policy prioritization.

Our work intends to:

- Enhance the regional integration of the security and public health responses to firearms trafficking and violence
- Create and support an effective pathway from regionally-grown research to evidence-based policymaking
- Improve the quality and availability of relevant data and analysis on matters related to regional firearms proliferation and misuse
- Engage with regional security, public health, and research stakeholders through knowledge sharing and policy prioritization
